Experience of the Past.

The experience in this state has been that the discovery of valuable re sources invariably follows explorations A notable example is the instance re the wanderers into the lands of Uncompangre river reservation, in the midst of dreary wastes unable to support life of any kind, discovered the valuable and absolutely new mineral, gilsonite, the production of which has given employment to hundreds of men and teams for the last twelve years. The value of those properties

The first object, however, of this expedition is to reveal the scenic won-ders of this region to the public. The expedition will be in charge of Mr. Culmer, whose paintings of the Grand Canyon region have occupied a con-spicuous place in American art. Two of these paintings are now in the Press club. He will be accompanied by Mr. Whitaker, who is recognized as the foremost scenic photographer of the state. They will take with them a full equipment so as to bring back replete data and illustrations.

Expect to Find Wonders.

As a result of this expedition it is expected and believed by the Commercial club and persons familiar with the development of the western country that this now unknown region will have lost its mystery and will be like an open book so far as researches can made in the limited time at the disposal of the explorers.

Mr. Culmer and Mr. Whitaker will leave April 1, and will proceed Thompson Springs, where they v leave the railway and reach the field by way of Moab, Monticello and Bluff City, from which latter place they will launch out into the great unknown. They have engaged as guide J. A. Scorup, of Bluff City, who is one of the few men who have ever beheld the great natural stone bridges, although even he admits that there are vast tureas in that region abounding with Wright.' cial. The party left Los Angeles Tuesday night and came through in good time, stopping along the line to inspect operations. They found the road had been exceptionally fortunate during the recent heavy storms on the desert in California and Nevada. While the Southern Pacific and Santa Fr suffered heavy injury from washouts and landalides of various points the Solt Lude slides at various points, the Salt Lake road, as the Californians call it, had practically no difficulty in operating trains. One little washout near Ontario, struction work which made such a condition possible.

Heavy Work Is Finished.

All the heavy work at both ends of the road is about completed. The big line change near Modena, which in-volved the construction of fourteer miles of new road to effect a reduction in the grade, is finished up and the last ralls laid by the tracklaying gang un-der Engineer Jones. The change in the old roadbed north of Milford, where some five miles of grade have been worked over to make the line conform o the lowest possible grade, is about inished so far as grading work is con cerned and will be relaid with seventy-five-pound steel immediately. On the California-Nevada end, the heavy work on Good Springs summit is about ready to close up. It involves some of the stiffest rock work on the entire route and is one of the best pieces of heavy construction in the west. E. O. Wattis, who has been down the line for the Utah Construction company, came in with Mr. Wells yesterday and reported his job there about ready to finish up. The track around the summit, which is hendling the heavy trains easily, has peed in construction there, but will be replaced soon with the permanent line over the summit. All along the line, the big cylindrical water tanks are being finished up, the passing tracks, which come every five miles of the way, are about all complete, some ballasting remains to be done on the main line, par ticularly where changes have been made in the old roadbed, and the fina details of construction are being picked

Opening Time Not Settled. The time for regular operations is still indefinite, and no announcement of op-erations will be considered until the erations will be considered until the construction contractors have turned over the completed work and had it accepted by the railroad company. Yards are being laid as Los Vegas, a roundhouse is being put under construction and the Caliente yards are being put into permanent shape for operations. Although work on the Utah end has been delayed somewhat by the recent heavy rains, it ought not to be long beore the construction is cleaned up and he plans for regular operation for

TRIAL PACKAGE MAILED FREE.

"Until about two years ago I had had piles for about thirty years, at times bleeding and very painfui. I got a fiftycent box of Pyramid Pile Cure at the drug store, and used it and was entirely cured; got another box in case I needed it, and as the piles did not return in six months I gave the remedy to a friend of mine who wanted the doctor to operate to cure him. My friend said he would use the "pyramids" but he knew they would do him no good, but they cured him of piles of twenty-five years' standing. I am free from piles today, and have been since using Pyramid Pile Cure. I was captain in the civil war." James Adams. Soldier's home, Cal.

The majority of people labor under the impression that an operation is necessary in severe cases of piles, or hemotrhoids, and are very skeptical regarding the remedial virtues of any medicinal compound. Testimony like the above should certainly have a tendency to dispel this impression, although it is odd that such a fallacy should prevail, and still more odd that so many people should think an operation effects a permanent cure, whereas the contrary is more often the case.

Just send your name and address to Pyramid Drug Co., 1848 Main St., Marshall, Mich., and receive free by return mail a trial package in a plain wrapper. Chicago, March 20.—"If a woman marries a brute she has a right to defend herself, even to the point of taking his life," said Judge George W. Kersten in his decision today when he took the case of Mrs. Jessie Hopkins, on trial for the murder of her husband, out of the hands of the jury. The charge against Mrs. Hopkins was then summarily dismissed. In deciding the case Judge Kersten declared that a woman is "not her husband's chattel." He held Mrs. Hopkins was justified. The woman shot her husband in a quarrel at their home on New Year's eve. Preceding the quarrel Hopkins had attacked his wife and threatened to kill her. She grabbed a revolver from a table and shot him.

Of Salt Lake,

Manages the Most Successful Collection Agency in the United States.

The Merchants' Protective Association of Salt Lake has the record for a higher percentage of successful collections on bad or delinquent accounts than any similar institution in the country. The Association is thoroughly and completely organized, with ramifications in every section of the United States. It is thoroughly conversant with every method of collection and has in many instances collected accounts of sixteen years standing. As an instance, in February we collected \$107.20 for Barnes, Hardy & Co. that had ten years' mildew on it.

The reputation of this Association for successful collections is a byword among Salt Lake business men. "Send it to Luke" means virtually that an account will be collected. To get the greatest good of the organization, become a member. The Rating Book is gratis and in addition members are entitled to free collections.
